

SEA Wire and Cable, Inc.

The Heart and Soul of Today's Aircraft

Since it was founded in 1970, SEA Wire and Cable, Inc. of Madison, Ala., has been dedicated to providing its clients with consistent, reliable quality, accurate technical support and exceptional customer service at a competitive price. For the last 35 years, SEA Wire and Cable, Inc. has been a full stocking supplier of mil-spec wire, cable and related harnessing products.

From the beginning, SEA has specialized in supplying wire, cable, tubing, termination sleeves, cable ties, EMI/RFI backshells and other cable assemblies for the most demanding electronic applications. To provide fast service to meet a wide range of client needs, the company currently stocks over 11,000 items and 40 million feet of wire in its modern 45,000-square-foot facility. These products are available 24 hours a day, which is why SEA Wire and Cable, Inc. has amassed over 4,800 customers around the world.

group of wire and cable companies whose products have passed a series of U.S. government-issued quality assurance tests.

Beyond offering the very best in mil-spec wire and cable, SEA offers a

number of value-added and supplemental services to its clients. These include laser wire marking, custom color coding, custom labels, dyeing, cut and strip wire, cut and marked tubing, etching, kitting and subassemblies. SEA also provides inventory management for its clients to suit their particular stock management needs, such as Kanban, JIT, dock to stock, demand-pull, consignment, stock rotation, or standard spools/packaging.

That's not all. SEA's testing laboratory can evaluate products based on solderability (with or without steam-aging), strip-ability (pull test), hipot (resistance, leakage, and breakdown), and spark (pinhole, integrity) vectors.

With its proven dedication to product quality and customer service, it is not surprising that SEA Wire and Cable, Inc. is on the approved quality assurance list for Boeing, Raytheon, Northrop Grumman, Unison Industries, Lockheed Martin and

other major aerospace companies. SEA has also won quality supply awards from many of these clients. Its client-bestowed honors include Boeing's Chairman's Award and AS9003 Audited award; Lockheed Martin's Star Supplier Award; and Preferred Supplier designations from Raytheon and Unison Industries. SEA also has won the U.S. Small Business Administration Award for Excellence.

"SEA can provide you the quantities you need, when you need it," says company General Manager Marty Clark. "For stock items, you don't have to contend with factory-dictated minimums or long factory lead times. We ship same day for in-stock items."

In addition, "SEA offers full traceability back to the source," Clark adds. "We maintain factory test reports and manufacturers' certificates of compliance for all mil-spec wire and cable."

Quality service, quality products, vast selection, and quick product delivery: All of these are offered by SEA Wire and Cable, Inc. 24 hours a day, 365 days a year, no matter where you are worldwide.

Of course, all the variety in the world is worthless if the products are not the very best. To ensure this to be the case at SEA, the company's quality-control procedures have been rigorously designed to meet Mil-I-45208A, UL, and CSA certificate requirements. As well, SEA only sells military products made by QPL (Qualified Product List) manufacturers, the select
